

**When your solution works simply, your monitoring program does too.**

Reliable hardware in a smart, cost-effective package. Allied Universal<sup>®</sup> Electronic Monitoring's Home Curfew RF Monitoring System gives you field-proven functionalities for low-risk participants.

## Benefits

### Two-Way Voice Communication

The Base Unit 3000 LTE allows outgoing calls to officers or the monitoring center and allows incoming calls from authorized users.

### Base Unit GPS Point

System reports the Base Unit location on request and during scheduled calls.

### Multiple Connection Methods

Connects via LTE cellular, Wi-Fi, and landline providing redundant communication. Provides peace of mind knowing participant data is delivered.

### Two-Way Bracelet (BTX)

Designed to encourage compliance, the BTX vibrates to notify the participant of a potential range violation. This optional feature can be customized to fit your program needs.

### Patented Strap Design

Allied Universal<sup>®</sup> Electronic Monitoring has patented a light-focusing technology that maximizes our ability to detect strap tampers. The strap contains an accurate fiber optic circuit; an internal copper wire aids in stretch resistance and durability.

### Supporting Software

Allied Universal<sup>®</sup> Electronic Monitoring's EM Manager software provides integrated monitoring, case management, reporting, inventory management, and range testing. The Mobile EM Manager app, available in the Apple and Android stores, allows users to perform essential RF monitoring functions while in the field.

Allied Universal® Electronic Monitoring is the industry leading technology and service company offering law enforcement and government agencies the widest variety of cutting-edge monitoring solutions, tailored to their specific needs. With operations in around 35 countries, we leverage an international network of expertise and resources in order to deliver a unique solution for our customers locally.

Our latest electronic monitoring technologies provide solutions that aim to ensure the safety of our communities, provide an alternative to incarceration, reduce prison overcrowding, lower recidivism, and improve reintegration.

With nearly 30 years of industry experience in providing innovative technology solutions and first-class service, we enable our customers to effectively monitor approximately 140,000 participants every day. This includes many of the world's largest electronic monitoring programs.
